Section 1

Introduction

Introduction

The enclosed Indirect Cost Allocation Plan identifies the costs of indirect services provided by central service departments of the City of El Paso, Texas (City) based on actual expenditures for fiscal year ending 8/31/2023. MGT Consulting Group (MGT) prepared these documents at the request of the City.

The Cost Allocation Plan is used by the City to claim indirect costs as charges against awards (grants) and City funds. The Cost Allocation Plan is kept on file by the City for review by interested parties.

These documents are prepared in compliance with 2 CFR Part 200. City personnel provided the expenditure and allocation data to MGT consultants. MGT consultants then prepared the Cost Allocation Plan utilizing a double step-down methodology.

Section 2
Certification of Cost Allocation Plan

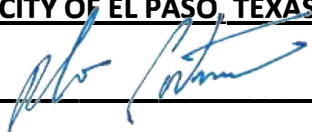

Certificate of Indirect Costs

This is to certify that I have reviewed the indirect cost rate proposal submitted herewith and to the best of my knowledge and belief:

- 1) All costs included in this proposal for the fiscal year ending August 31, 2023 to establish billing or final indirect costs rates for fiscal year 2025 are allowable in accordance with the requirements of the Federal award(s) to which they apply and 2 CFR Part 200, "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards". Unallowable costs have been adjusted for in allocating costs as indicated in the indirect cost proposal.
- 2) All costs included in this proposal are properly allocable to Federal awards on the basis of a beneficial or causal relationship between the expenses incurred and the agreements to which they are allocated in accordance with applicable requirements. Further, the same costs that have been treated as indirect costs have not been claimed as direct costs. Similar types of costs have been accounted for consistently and the Federal government will be notified of any accounting changes that would affect the predetermined rate.

I declare that the foregoing is true and correct.

Reading a Cost Allocation Plan

Reading the Cost Allocation Plan

Overview

The Federal 2 CFR 200 Cost Allocation Plan is a document that distributes, or allocates, City indirect costs. Indirect costs are those costs incurred by City divisions and departments that benefit other City divisions and departments. Examples of City indirect costs are accounting, purchasing, human resources and information technology.

The primary purpose for preparing the Cost Allocation Plan is to (1) identify the appropriate division and department indirect costs and (2) calculate corresponding indirect cost rates if needed.

The significant steps involved in preparing the Cost Allocation Plan include the following:

- Identify the City divisions and departments that provide support to other City divisions and departments. These divisions and departments are referred to as central service or allocating departments.
- Identify the City divisions and departments that receive support from other City divisions and departments. These departments are referred to as grantee or receiving departments.

- Accumulate the allowable actual expenditures of the City divisions and departments that provide support to other City divisions and departments.
- Distribute, or allocate, the allowable expenditures of the City divisions and departments that provide support to other City divisions and departments based on available, meaningful, measurable and auditable allocation statistics that match the service provided to the service received.

Process

A double-step down allocation methodology is used to allocate the allowable costs of the central service divisions and departments. This methodology recognizes the cross support provided between central service divisions and departments. For example, the office of the comptroller supports the information technology department by managing capital assets, paying vouchers and preparing financial reports. However, the information technology department also supports comptroller's office, by providing software and hardware support and by maintaining and administering various applications and systems.

The double-step down methodology requires an initial sequencing of allocating divisions and departments. In the first step of the double-step methodology, allowable costs from central service divisions and departments are allocated in the sequence selected to all City divisions, departments and funds; including to other central service divisions and departments. The second step in the double-step down methodology is made to fully account for the cross support provided between central service divisions and departments. Central service divisions

and departments are closed after the second step in the double-step down allocation methodology.

Sections

Table of Contents

The first few pages of the Cost Allocation Plan are the Table of Contents. The column on the left side of the pages lists the central service, or allocating, divisions and departments. Each central service division and department is broken down into functions. Functions are the specific services provided by a particular division and department. The middle column lists the allocation base for each corresponding function. The column on the right side of the pages is the applicable page number.

Summary Schedule

The next few pages of the Cost Allocation Plan are the Summary Schedule. The Summary Schedule identifies the total dollar amount allocated from every City allocating division and department to every City receiving division and department. Allocating divisions and departments are listed down the left column and receiving divisions, departments and funds are listed across the top of each page.

Detail Schedules

The remaining pages of the Cost Allocation Plan are the detail schedules for every central service division and department. The detail schedules for each central service division and department are structured in the following format.

Narrative - Lists the division and department name, provides a brief description of the activities performed, along with identifying the functions and the corresponding allocation base.

Departmental Costs (A) – Lists the actual expenditures for that division and department.

Incoming Costs (B) – Represents the support costs coming into the division and department from other allocating divisions and departments.

Total Allocated (C) - The total amount allocated for that division and department. This amount is found at the end of the Incoming Costs schedule.

Function Allocations - The distribution, or allocation, of the Total Allocated costs by function.

Allocation Summary – Shows the summary of allocated costs by function.

The Purchasing and Strategic Sourcing Department provides internal and external training, bidding, and contract administration services to City Departments so they can obtain goods and services at the best value to achieve their mission and strategic results. Costs have been functionalized as follows:

ADMINISTRATION - Costs identified to this function are representative of staff compensation and operational expenditures associated with the procurement of goods and services. These costs are allocated based on the total number of purchase orders issued per department.

SUPPLY CHAIN MANAGEMENT - Costs identified to this function are representative of staff compensation and operational expenditures to perform supply chain management functions for the City. These costs are allocated based on the total number of purchase orders processed per department, excluding those departments who pay for their own purchasing staff (Airport, Environmental Services, Streets, Fleet, and Sun Metro).

VENDOR REVENUE – Revenue from vendors who participate in the City’s purchasing process has not been allocated in this plan as it does not relate to departmental operations.
